# Ziao Yang

+1 (781) 392-8208 | https://yangziao56.github.io/homepage | ziaoyang@brandeis.edu

## EDUCATION

**Brandeis University** — Waltham, MA
Ph.D. Candidate in Computer Science — 09/2023 - 05/2027 (Expected)
*Advisor*: Professor Hongfu Liu

**Sun Yat-Sen University** — Guangzhou, China
B.Eng. in Computer Science and Technology — 09/2018 - 06/2022

## RESEARCH INTERESTS

**Large Language Models:** Data Curation for Pre-Training and Post-Training, AI Agents, Model Evaluation, and Efficient Inference

**Data-Centric Learning:** Data Valuation, Influence Functions, and Data-Efficient Training

**Spatiotemporal Forecasting:** Transformer-based Video Prediction and Precipitation Nowcasting

## SKILLS

Python, PyTorch, JAX, Hugging Face, DeepSpeed, Tunix, vLLM, SGLang, Multi-GPU, Multi-Host TPU, SFT, PPO, GRPO, DPO, Distillation, LLM Evaluation, Data Curation, Synthetic Data, AI Agents, RL Environment Design, Reward Design, Verifiers & Graders, Eval Harnesses, Agent Evaluation, Reward Modeling

## RESEARCH & INDUSTRY EXPERIENCE

**Adobe Research** — Seattle, WA
*Research Scientist Intern*, Mentor: Dr. Vlad Morariu — 05/2026 - 08/2026
Worked on accelerating HTML generation in Adobe's Project Avalon agentic pipeline by replacing Claude Sonnet calls in selected agents with locally served LLMs.

- Developed task decomposition and parallel generation methods, evaluating the trade-offs between inference latency and output quality.
- Explored knowledge distillation; built an end-to-end pipeline to generate data with a 480B teacher and fine-tune, serve, and evaluate 8B student LLMs.

**Google Tunix Research Collaboration** — Remote
*Academic Research Collaborator* — 09/2025 - 05/2026
Researched data-centric LLM post-training using Google Tunix on TPUs.

- Developed self-influence and outlier-based methods to filter low-signal samples in GRPO and DPO.
- Implemented DeepScaleR math-reasoning post-training and AIME 2024 evaluation on multi-host TPUs.

**Adobe** — San Jose, CA
*Machine Learning Engineer Intern*, Mentor: Dr. Lei Zhang — 05/2025 - 08/2025
Developed controllable headline and email generation for Adobe GenStudio for Performance Marketing, supporting enterprise marketing workflows.

- Improved offline quality through multi-persona generation and evaluation.
- Trained a reward model and applied PPO for brand-aligned generation; first-author paper accepted to EMNLP 2026 (main conference).

**International Digital Economy Academy (IDEA)** — Shenzhen, China
*Research Scientist Intern*, Mentor: Dr. Jiaxing Zhang — 03/2022 - 07/2022
Contributed to the Fengshenbang language-model project (4.1K GitHub stars).

- Pre-trained BERT (1.3B) and GPT-2 (3.5B) models from scratch.
- Built datasets of 27 million labeled examples for multi-task classification.
- Performed supervised continued pre-training across classification tasks using MAML and Reptile.

## RESEARCH & INDUSTRY EXPERIENCE

**Y Combinator China** — Beijing, China
*Intern*, Mentor: Dr. Qi Lu — 03/2023 - 07/2023

Conducted AI industry research and startup scouting, translating technical and market trends into strategic insights for leadership.

- Prepared presentations and financing materials for Dr. Qi Lu, including "My Foundation Model Worldview."
- Scouted emerging AI startups and synthesized insights from discussions with scientists at leading AI labs.

**Sun Yat-Sen University** — Guangzhou, China
*Research Assistant*, Mentor: Dr. Qifeng Lin — 2020 - 2022

Researched Transformer-based video and spatiotemporal forecasting.

- Developed TCTN, combining Transformer attention with 3D temporal convolutions to model short- and long-range dependencies for future-frame prediction on MovingMNIST and KTH.
- Extended TCTN to PTCT for autoregressive radar-echo forecasting and precipitation nowcasting on Radar Echo Guangzhou and HKO-7.
